

STRATA DP5000

DP5130F-SDL

Digital hands-free featurephone with 10 programmable keys and a large 9-line, backlit, LCD display for full on-screen prompts.

Key benefits:

- » Red/Green Busy Lamp Field (BLF) indication shows who is on the phone or available.
- » Red/Green ringing LED for easy distinction of internal and external calls.
- » Context sensitive soft keys provide intelligent feature presentation for applications such as voicemail.
- » 10 different ring tones provide simple identification of the type of call.
- » Direct Dial-In (DDI) numbers can be assigned a specific ring tone for particular projects.
- » Access to shared mailboxes through multiple message waiting indication.
- » One-touch group pick-up with easy recall of calls placed on hold.
- » On-screen directory dialling on LCD featurephones reduces the need to search for numbers.
- » Easy printing and changing of paper inserts, and easy expansion of flexible buttons through Add-on Modules (ADM) and Direct Station Select (DSS), including a self-labelling ADM.
- » Flexible and one-touch keys can be configured for regularly used functions.
- » Contact centre supervisors can monitor calls for quality purposes, without the handset picking up background noise.
- » Integrated headset interface to plug supported headsets directly into the featurephone, without the need for an adapter.

Toshiba's DP5000 series of digital featurephones offer a wide choice of functionality, and range from a low-cost entry-level option through to a sophisticated large display featurephone with 10 flexible keys.

Supremely robust and reliable, the DP5000 series of featurephones from Toshiba provide a range of functionality to the user, helping improve productivity and efficiency.
